## Professional Summary

Master's student in Computer Science with hands-on experience in backend and full-stack development, and a strong foundation in **algorithms, databases, and cloud platforms**. Built and maintained multiple web applications with a focus on real-time interfaces, secure transactions, and data integration. Proficient in modern development tools and agile methodologies with exposure to team-based software delivery pipelines. Strong collaboration and communication skills with leadership experience in academic and industry projects. Certified **AWS Cloud Practitioner** with working knowledge of cloud services and scalable architecture.

## Education & Certification

University of Alabama at Birmingham, USA
**Master's in Computer Science** (Jan 2023 – Apr 2025) — GPA: 3.30/4.00

Jain University, Bangalore, India
**Bachelor of Technology in Computer Science** (Jan 2019 – Jul 2022) — CGPA: 7.89/10

Certification: AWS Certified Cloud Practitioner **(CLF-C02)** & AWS Certified Developer Associate **(DVA-C02)**

## Skill Set

Languages: **Python, Java, JavaScript, C, C++**
Frontend: **React, HTML, CSS**
Backend/Database: **MySQL, SQL, Salesforce (Apex)**
Cloud: **AWS**
Tools: **GitHub, WebSockets, VS Code**
Soft Skills: **Communication, Teamwork, Problem-solving, Leadership**

## Work Experience

**Qbarters Pvt Ltd – Bangalore, India**
Junior Software Engineer (Jul 2021 – Dec 2022)

- Created and sustained 6 software applications with an 85% average bug-free code deployment rate.

- Designed and implemented a payment page using JavaScript **Payment SDK** and integrated it with **SQL database** for transaction tracking.
- Built real-time delivery tracking system using **JavaScript, WebSockets, and SQL** to deliver live updates and enhance customer experience.
- Implemented features using **Python, JavaScript, and SQL** with relational data management via **primary keys**.
- Collaborated with product, design, and QA teams to deliver projects on time.

**Letsgettin Pvt Ltd – Bangalore, India**
Software Engineer Intern (Jan 2021 – Jun 2021)

- Fixed bugs during product deployment and improved code quality.
- Participated in **sprint planning**, learning agile workflows and project tracking.
- Created case models based on business requirements and product goals.

## Projects

**Bank and Institute App** (Jun 2024 – Aug 2024)
- Developed a **Salesforce-based** application to manage operations and data for banks and educational institutes using interconnected **SQL tables**.

**Drones in Agriculture** (Sep 2023 – Nov 2023)
- Led backend programming and **flight control implementation**.
- Built a **JavaScript** dashboard for real-time drone data during farming operations.
- Trained a **machine learning model** for drone decision-making.

**Student Database System** (Feb 2022 – Jun 2022)
- Co-led development of a web application in **Python** to manage student academic data.
- Designed a dashboard interface and integrated **SQL database** for storage and retrieval.

**Progressive Web Chat App** (Feb 2021 – May 2021)
- Built a secure chat system using **Python with encryption**, WhatsApp-style interface, and **PWA principles** for cross-platform usability.

**Online Car Booking System** (Sep 2020 – Dec 2020)
- Led backend development using **JavaScript and SQL.**
- Designed booking features and persistent database storage.

## Academic Topics

- Key Subjects: Artificial Intelligence, Machine Learning, Deep Learning, Software Engineering, Database Systems, Cyber Risk Management, Network Security, Advanced Algorithms, Data Science.
